Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3, 5, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ito (US 5,476,618) in view of JP 10-077359 substantially as set forth in the Office Action mailed on 08/26/2003. The amendment filed on 12/19/2003 has been entered and carefully considered. Independent claim 1 has been amended to recite "the surface layer is fusion bonded directly to the foam layer". Figure 17 of Ito shows that the skin layer 105 is directly bonded to the layer of expanded bead resin foam 103, therefore, claim 1 continues to be unpatentable over the applied prior art. The indicated allowability of the subject matter of claim 9 is withdrawn and is now included in the 103 art rejections as stated. Ito is silent as to the fusion bonding between the surface layer and the foam layer. However, it is a product-by-process limitation not as yet shown to produce a patentably distinct article. It is the examiner's position that the molding composite of Ito as modified by JP'359 is identical to or only slightly different than the claimed molding composite prepared by the method of the claim, because both articles are formed from the same materials, having structural similarity (foam beads/ coat covering /surface layer). The Ito/JP'359 reference suggests the claimed subject matter. It is noted that if the applicant intends to rely on Examples in the

specification or in a submitted Declaration to show non-obviousness, the applicant should clearly state how the Examples of the present invention are commensurate in scope with the claims and how the Comparative Examples are commensurate in scope with Ito/JP'359.
